THE CLEVER ROBOT ENTERPRISE LEVEL EMAIL

Mac Mail Email Setup

In this tutorial we will be guiding you through the process of configuring email on Mac Mail. We are using Mac Mail Version 10.2 on OS X. If you are using a different version or operating system, these instructions may differ.

How do I find my email cluster?

In order to setup your email client, you will need to know which email cluster your account is hosted on. If you don't know this information, you can check with your email service provider, or try logging into webmail at:

Cluster A:

<http://mail.hostedemail.com>

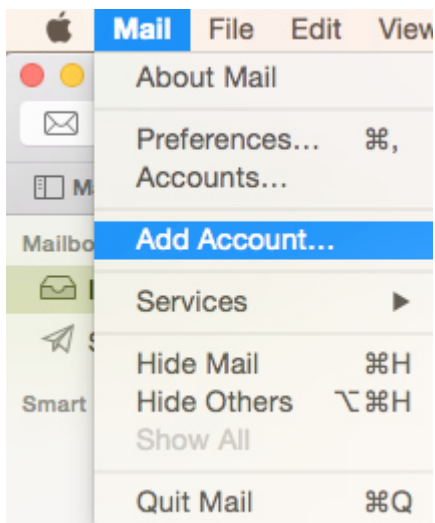

Cluster B:

<http://mail.b.hostedemail.com>

If you are able to successfully login to the webmail interface, then you have found your mail cluster. If you are not able to login to either cluster, please contact your email service provider for support.

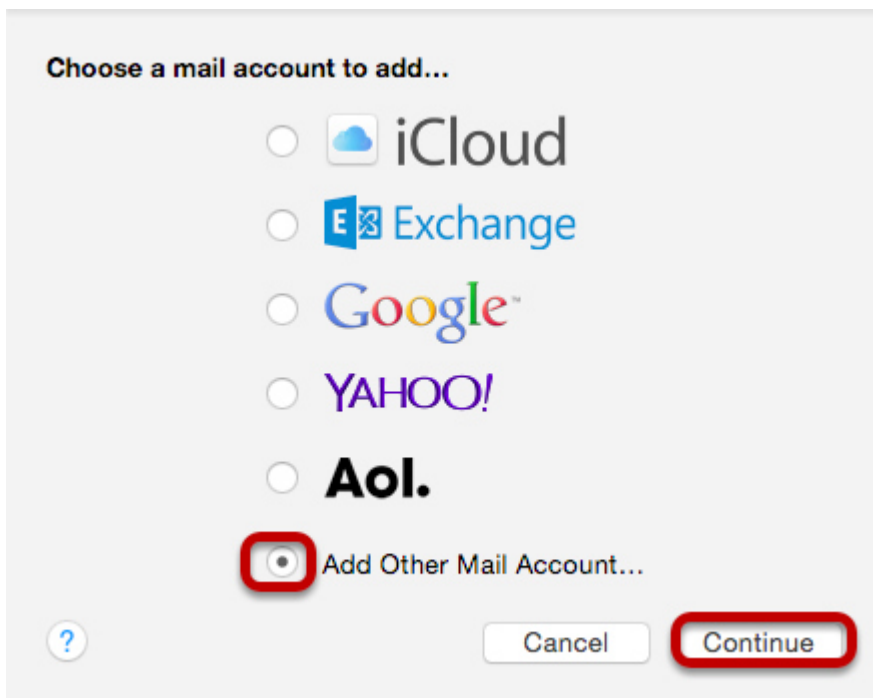

Please note: This proposal is confidential and is intended only for the individual or entity to which it is addressed and may contain information that is proprietary and/or privileged. Any dissemination, distribution or copying of this communication by someone other than the intended recipient, is strictly prohibited.

Step 1: Add Account

Launch Mac Mail, click on **Mail** and then select **Add Account**.

Step 2: Select Account Type

Please note: This proposal is confidential and is intended only for the individual or entity to which it is addressed and may contain information that is proprietary and/or privileged. Any dissemination, distribution or copying of this communication by someone other than the intended recipient, is strictly prohibited.

Choose **Add Other Mail Account** and click **Continue**.

Step 3: Enter Account Information

Add a Mail Account

To get started, provide the following information:
