THE CLEVER ROBOT ENTERPRISE LEVEL EMAIL

Thunderbird Email Setup

This tutorial will walk you through the configuration of email using Thunderbird. For this tutorial, we are using Thunderbird 45 on Mac. If you are using a different version or operating system, these instructions may differ.

How do I find my email cluster?

In order to setup your email client, you will need to know which email cluster your account is hosted on. If you don't know this information, you can check with your email service provider, or try logging into webmail at:

Cluster A:

<http://mail.hostedemail.com>

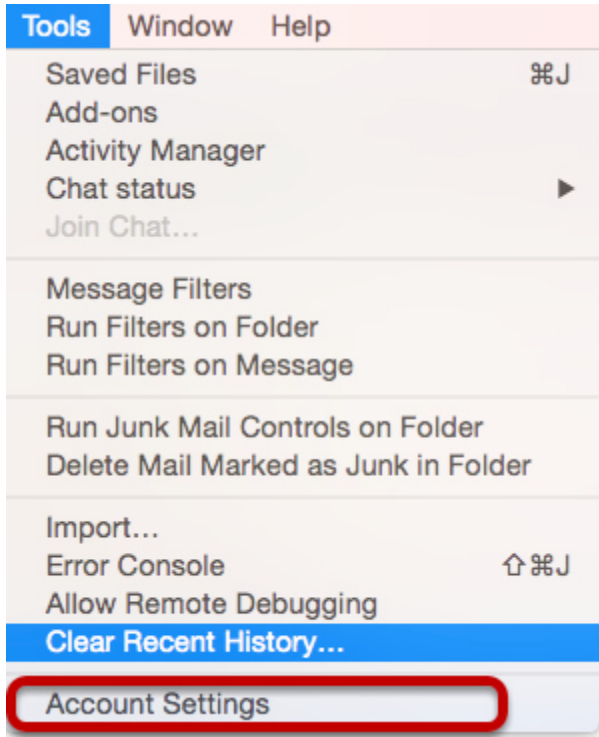

Cluster B:

<http://mail.b.hostedemail.com>

If you are able to successfully login to the webmail interface, then you have found your mail cluster. If you are not able to login to either cluster, please contact your email service provider for support.

Any dissemination, distribution or copying of this communication by someone other than the intended recipient, is strictly prohibited.

Step 1: Open Account Settings

Launch Thunderbird, click on **Tools**, and select **Account Settings**.

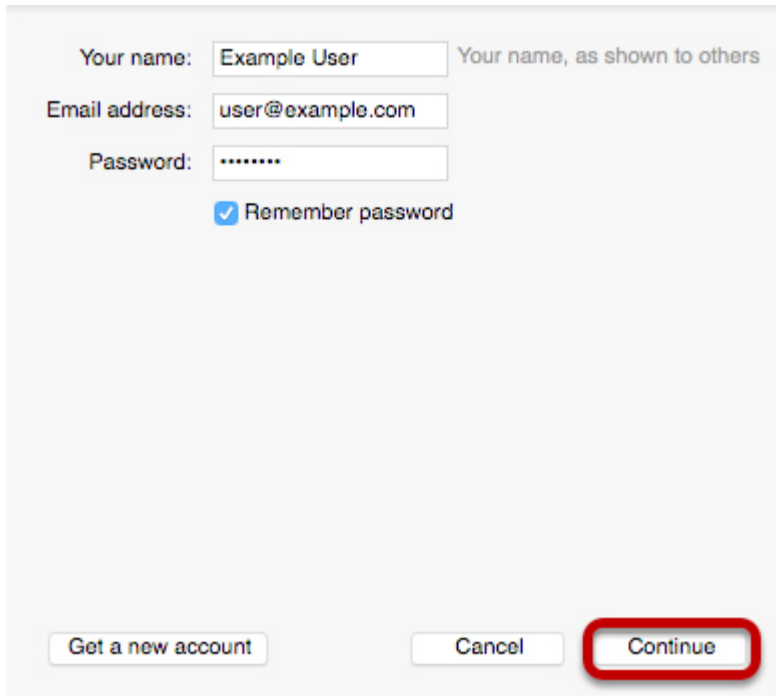

Step 2: Add Mail Account

Under **Account Actions**, click **Add Mail Account...**

Please note: This proposal is confidential and is intended only for the individual or entity to which it is addressed and may contain information that is proprietary and/or privileged. Any dissemination, distribution or copying of this communication by someone other than the intended recipient, is strictly prohibited.

Step 3: Enter Account Information

Your name: Your name, as shown to others

Email address:

Password:

Remember password

Enter the following information:

Your Name:

This is the name that will appear on all outgoing mail from the account.

Email Address:

Enter your full email address.

Password:

Enter the password for your email address.

Click **Continue**.

Please note: This proposal is confidential and is intended only for the individual or entity to which it is addressed and may contain information that is proprietary and/or privileged. Any dissemination, distribution or copying of this communication by someone other than the intended recipient, is strictly prohibited.

Step 4: Enter Account Information

The screenshot shows the Thunderbird account setup interface. At the top, there are input fields for 'Your name' (Example User), 'Email address' (user@example.com), and 'Password' (masked with dots). A 'Remember password' checkbox is checked. Below this is a warning icon and the text 'Thunderbird failed to find the settings for your email account.' The main section is a table for server settings:

	Server hostname	Port	SSL	Authentication
Incoming:	mail.hostedemail.com	993	SSL/TLS	Autodetect
Outgoing: SMTP	mail.hostedemail.com	465	SSL/TLS	Autodetect
Username: Incoming:	user@example.com		Outgoing:	user@example.com

At the bottom, there are buttons for 'Get a new account', 'Advanced config', 'Cancel', 'Re-test', and 'Done'.

Enter the following information:

Incoming Protocol: IMAP or POP3 as per your preference. We recommend IMAP.

Server Hostname: mail.hostedemail.com (Cluster A) or mail.b.hostedemail.com (Cluster B)

Port 993 (incoming IMAP) 995 (Incoming POP3)465 (outgoing)

SSL:

SSL / TLS

Authentication:

Auto-detect

Username:

Your full email address

Once you are finished, click **Re-Test**. Thunderbird will test your account settings and account creation will be complete.
